Professional Summary

Full-Stack Developer with 2+ years of experience developing and maintaining web and mobile applications, REST APIs, administrative systems, and business automation. Skilled in Angular, React, JavaScript, TypeScript, Node.js, Express.js, C#, ASP.NET Core, PHP, Python, SQL, and MongoDB. Hands-on experience with JWT authentication, role-based access control, database design, real-time communication, integrations, testing, and deployment.

Technical Skills

Frontend: Angular, React.js, Next.js, JavaScript, TypeScript, HTML, CSS, Tailwind CSS, responsive design
Backend & APIs: Node.js, Express.js, C#, ASP.NET Core, PHP, Python, FastAPI, Flask, REST APIs
Databases: Microsoft SQL Server, MySQL, MariaDB, PostgreSQL, MongoDB Atlas, SQL
Mobile: React Native, Expo, Flutter, Dart
Security & Integrations: JWT, Google OAuth, role-based access control, HMAC-signed webhooks, Socket.IO, Meta WhatsApp Cloud API, OpenAI API, SMTP, third-party APIs
Tools & Delivery: Git, GitHub, Jira, Microsoft Teams, Hostinger, Render, VPS, cron jobs, cloud deployment, testing, debugging
SEO: Technical SEO, Google Search Console, XML sitemaps, Schema.org structured data, semantic HTML
Automation: TradingView, Pine Script, MetaTrader 5, MQL5, Telegram integration

Professional Experience

Full-Stack & Mobile Developer | Self-Employed (Freelance) | Lebanon (Remote) | Jul 2025 – Present
- Develop and deliver web applications, mobile applications, REST APIs, and custom software for local and international clients.
- Build responsive interfaces, administration dashboards, backend services, and relational/NoSQL data integrations.
- Implement authentication, access controls, real-time updates, webhooks, and third-party API integrations.
- Manage requirements, testing, deployment, troubleshooting, maintenance, and post-launch support.

TradingView Automation Specialist | The Trading Routine (Concurrent) | Lebanon (Remote) | Mar 2026 – Present
- Develop Pine Script indicators and alerts with secure HTTPS webhooks and real-time Telegram notifications.
- Integrate TradingView signals with MetaTrader 5 and risk-management tools; support automation across 9+ trading accounts.
- Improve signal handling with validation, logging, retries, and error handling.

Full Stack Developer | Soft Hub Information Technology | Dubai, UAE (Remote) | Dec 2025 – May 2026
- Develop Angular interfaces and ASP.NET Core backend features for enterprise applications.
- Build REST APIs with authentication and role-based authorization; design relational database structures.
- Resolve frontend and backend defects and collaborate remotely on testing and delivery.

Web & Mobile Developer | Freelance Collaboration (Concurrent) | Ansar, Lebanon (Remote) | Oct 2024 – Mar 2025
- Implement responsive interfaces, backend features, API and database integrations, and bug fixes.
- Test across devices and coordinate assigned work with developers using Jira.

Flutter Developer | Infinity Labs (Internship) | Beirut, Lebanon (Remote) | Jul 2024 – Oct 2024
- Develop Flutter screens and reusable widgets with navigation, forms, validation, and API integrations.
- Debug application issues and improve responsive behavior across device sizes.

Projects

Smart Service – Home-Service Marketplace
React Native, Expo, Node.js, Express.js, MongoDB Atlas, Socket.IO
Built a customer/provider service marketplace with JWT authentication, location-based provider discovery, real-time updates, tracking, notifications, ratings, and Arabic/English support.
GitHub: github.com/kareem-kobeissi/SmartServiceApp

The Trading Routine – Trading Education & Automation Platform
PHP, MySQL, JavaScript, HTML5, CSS3, Python, FastAPI, OpenAI API, Meta WhatsApp Cloud API, Google OAuth, MetaTrader 5/MQL5, REST APIs, Webhooks, GitHub, Render, Hostinger
Built and deployed a full-stack platform combining online courses, MetaTrader 5 tools, TradingView indicators, payment workflows, and automated customer communication.
- Implemented email/password and Google sign-in with email and WhatsApp OTP verification; built course enrollment, product ordering, payment-proof submission, and access management.
- Created an admin dashboard for users, orders, product access, transaction history, customer conversations, and Excel exports.
- Integrated the Meta WhatsApp Cloud API (OTP, templates, order notifications, webhooks) and built a Python/FastAPI service on Render that processes webhooks, emails, and attachments, using OpenAI to summarize, translate, and recommend replies while admins keep final approval.

- Developed an MT5 licensing system with unique license keys, account activation, 30-day expiry, renewal, suspension, and account reset.
- Secured the platform with signed webhooks, callback authentication, protected credentials, and access controls; added SMTP email notifications and cron-based background jobs.
- Improved performance and SEO with fast-start H.264 video streaming, lazy loading, Search Console, XML sitemap, canonical URLs, and structured data; deployed on Hostinger and Render via GitHub.

ERTKAZ Group – Bilingual Corporate Website

Next.js, React, TypeScript, Tailwind CSS, GSAP

Built a bilingual Arabic/English corporate website for a business consulting firm with RTL support, animated editorial layouts, company profiles, dedicated service pages, and static deployment.

GitHub: github.com/kareem-kobeissi/ertkaz-group-website | **Live:** ertkazgroup.com

Taxi Platte – Taxi Company Website (Germany)

PHP, HTML5, Tailwind CSS, CSS3, JavaScript, Schema.org (JSON-LD), Git, GitHub

Built a responsive multi-page website for a German taxi company with Home, About, Services, and Contact pages using reusable PHP components for the header, footer, and testimonials.

- Added WhatsApp booking, click-to-call, pricing, service-coverage, FAQ, testimonial carousel, and gallery sections for airport transfers, city rides, hourly bookings, business travel, and parcel delivery.
- Implemented scroll, parallax, and card animations with accessible navigation and reduced-motion support.
- Improved search visibility with dynamic titles, meta descriptions, robots directives, semantic HTML, image alt text, and Schema.org structured data.

Rana Clinic – Dietitian Website & Online Shop

PHP, JavaScript, HTML5, CSS3, Responsive Design, Git, GitHub

Developed a responsive website for a dietitian practice in Lebanon with services, courses, an e-commerce shop with cart, client account registration and login, testimonials, and a contact page.

GitHub: github.com/kareem-kobeissi/dietitian-website | **Live:** dietitianranacheaib-mena.online

RJI World – Fashion & Lifestyle Brand Website

PHP, JavaScript, HTML5, CSS3, Responsive Design, Git, GitHub

Developed a bilingual English/Arabic brand showcase website for a multi-brand fashion, beauty and media group with brand portfolio pages, sign-up and login access, contact integrations, and responsive design.

GitHub: github.com/kareem-kobeissi/klas-boutique-website | **Live:** rjiworld.online

Music App Using AI

Flutter, FastAPI, PostgreSQL, Cloudinary

Developed a music application with user authentication, audio playback, favorites, playlists, song uploads, and media storage integration.

GitHub: github.com/kareem-kobeissi/Music-App-Using-AI

Other Projects: TradeVision Company Website (React, Vite); Clothing Store Website; ChocoSushiGarden System; ScannerCode Mobile App.

Education

Bachelor of Science in Computer Science | Lebanese International University | Oct 2022 – Jun 2025
General Science High School Certificate | Ansar High School | 2019 – 2022

Certifications

Supervised Machine Learning: Regression and Classification | DeepLearning.AI / Stanford University via Coursera | 2024
Fundamentals of Cybersecurity | YouBee.ai | 2023
CCNAv7: Introduction to Networks | Cisco Networking Academy | 2024
Get Connected | Cisco Networking Academy | 2022
League of Logics Workshop (Participation) | Phoenicia University | 2024
Certificate of Attendance | IEEE – PU Student Branch | 2024
