PROFESSIONAL SUMMARY

Full-Stack & Mobile Developer with hands-on experience building business web applications, cross-platform mobile applications, REST APIs, administration systems, real-time platforms, and workflow automation. Experienced with Angular, React, React Native, Node.js, ASP.NET Core, C#, PHP, JavaScript, Python, SQL, and MongoDB, including JWT authentication, role-based access control, database design, API integrations, webhooks, testing, deployment, and ongoing support. Focused on reliable architecture, secure and maintainable code, responsive user experiences, and practical business solutions.

PROFESSIONAL EXPERIENCE

Full-Stack & Mobile Developer, Self-employed
Jul 2025 - Present
Lebanon - Remote

- Deliver end-to-end web, mobile, and custom software solutions for local and international clients, from requirements and architecture through deployment and post-launch support.
- Build responsive web applications, cross-platform mobile applications, REST APIs, administration dashboards, and relational/NoSQL data layers.
- Implement secure authentication, role-based access control, real-time communication, automation, webhooks, and third-party API integrations.
- Own testing, deployment, maintenance, troubleshooting, and ongoing support across client and cloud environments.
- Selected work spans education/trading platforms, digital storefronts, mobile service marketplaces, reservation systems, inventory tools, and workflow automation.

TradingView Automation Specialist, The Trading Routine - Freelance
Mar 2026 - Present
Lebanon - Remote

- Develop TradingView indicators and Pine Script alerts with secure HTTPS webhook processing and real-time Telegram notifications.
- Integrate TradingView signals with MetaTrader 5 and build position-sizing and risk-management utilities for automated execution workflows.
- Support centralized automation across 9+ trading accounts using cloud/VPS infrastructure and configurable risk controls.
- Improve real-time signal reliability through validation, logging, retries, and error handling.
- Translate client trading rules into configurable automation workflows while preserving risk-management controls.

Full Stack Developer, Soft Hub Information Technology - Full-time
Dec 2025 - May 2026
Dubai, UAE - Remote

- Developed reusable Angular interfaces and ASP.NET Core backend functionality for business and enterprise applications.
- Built and integrated REST APIs with secure authentication and role-based authorization.
- Designed relational database structures and resolved defects across frontend and backend layers to support maintainable enterprise software.
- Collaborated remotely through planning, implementation, testing, and delivery using Microsoft Teams.
- Core technologies: Angular, C#, ASP.NET Core, SQL, REST APIs.

Collaborator, Freelance - Freelance
Oct 2024 - Mar 2025
Ansar, Lebanon - Remote

- Collaborated with distributed freelance developers on mobile and web projects across frontend and backend tasks.
- Implemented responsive interfaces, backend functionality, API/database integrations, bug fixes, and feature improvements.
- Tested functionality across devices and screen sizes and tracked assigned work in Jira.
- Coordinated remotely with developers to deliver assigned requirements reliably.

Flutter Developer, Infinity Labs - Internship
Jul 2024 - Oct 2024
Beirut, Lebanon - Remote

- Developed responsive cross-platform Flutter interfaces with reusable widgets and structured application screens.
- Implemented navigation, forms, input validation, interactive components, and API/data integrations.
- Diagnosed application issues and applied responsive-design practices across device sizes.
- Used Git for version control while strengthening mobile architecture, clean-code, and application-testing practices.

EDUCATION

Bachelor of Science - BS, Computer Science, Lebanese International University — Oct 2022 - Jun 2025

High School Certificate, General Science, Ansar High School — 2019 - 2022
